The proposed amendments are intended to allow the regulation to address circumstances in which the Federal Open Market Committee has established a target range for the federal funds rate rather than a single target rate, and to reflect the expiration of the TALF program. In particular, the following information would be made public for the first time: 1) a range of loss rates, estimated using the Board's models, for loans held by CCAR firms; 2) portfolios of hypothetical loans with loss rates estimated by the Board's models; and 3) more detailed descriptions of the Board's models, such as certain equations and key variables that influence the results of those models.
